

Spare parts and service works

In January 2007 company PRO-FILTR started to operate independent service department in order to improve customer support. The aim is to provide qualified service of air-conditioning and filtration equipment including technical consultant service for customers.

In 2008 we were certified ISO 9001. We provide guarantee and after-guarantee service around all Czech and Slovak Republics as well as in EU countries. Our qualified workers use modern technologies and professional tools.

Our aim is to provide professional service in the area of service provision and spare parts delivery.

Diagnostics and measuring:

- air flow speed measuring
- exhausted air volume measuring
- pressure drop measuring
- noise measuring
- flowing air temperature measuring
- bearing analysis
- analysis of disbalances on rotating parts, e.g. fan impeller including dynamic balancing at the customer`s plant without the need of shutdown
- all works can be provided including protocol concerning the device condition (measuring is not authorised)

Service works:

- filtration media exchange
- piping repairs
- filtration device repairs of all producers
- fan repairs
- our own production of filtration media- filtration elements according to sample or drawing documentation

Spare parts supply:

- switchboards including electric cable instalation for various devices
- screw conveyers, rotating feeders and other systems for emptying and transport of dust
- regeneration systems (pneumatic valves, electric valves, control units, etc.)
- pneumatic, servo-motor or hydraulic drives of regulation and shut-off devices, e.g. flaps and air flow regulator gates (highbinders)

Others:

- complete range of air-conditioning spare parts (with circular and square profile) - welded (group II and III), skived, stainless, spiro, plastic including all types of adapting pipes
- air-conditioning suction hoses, pressure hoses, transport hoses, various clips, flexible joints etc.
- wide range of spare parts for air-conditioning and filtration equipment
